

Kaaysha Rao

Kaaysha.rao@gmail.com | (+91) 7483423989

Aspiring AI & Data Science student with hands-on experience in machine learning, NLP, and data-driven applications. Strong in problem-solving, collaboration, and building scalable solutions. Eager to apply AI skills to real-world challenges and contribute to innovative projects.

SKILLS

- ❖ **Programming:** Python, SQL, C
- ❖ **Machine Learning:** Supervised & Unsupervised Learning, Model Evaluation, Feature Engineering
- ❖ **Deep Learning:** Basics of Neural Networks, TensorFlow (Fundamentals)
- ❖ **NLP:** Text Preprocessing, Sentiment Analysis
- ❖ **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn
- ❖ **Libraries & Tools:** Scikit-learn, TensorFlow, Jupyter Notebook, Google Colab
- ❖ **Core Concepts:** Data Structures, Algorithms, Statistics (Basics)
- ❖ **Version Control & Environment:** Git, Linux
- ❖ **Azure Technologies (Microsoft Azure)**
- ❖ **Retrieval-Augmented Generation (RAG)**

EDUCATION

- ❖ Artificial Intelligence and Data Science | Alliance University
CGPA: 9.4 | (29/3/2026)
- ❖ XII (CBSE) | Delhi Public School
98.6% | 2024

EXPERIENCE

AI Engineer|IBM Sustainable Development Internship

Date: Jan -Feb(2026)

- ❖ Developed **Truth Shield**, an NLP-based misinformation detection system using machine learning
- ❖ Performed text preprocessing, feature extraction, and model training on real-world datasets
- ❖ Achieved ~85% accuracy and improved efficiency of automated content verification
- ❖ Generated insights to support sustainable, ethical, and data-driven decision-making

Founder | Screener Pro – AI Recruitment & Screening Platform

March 2025 – Present

- ❖ Founded and leading an AI-powered recruitment startup focused on automating candidate screening and talent shortlisting
- ❖ Designed and developed intelligent resume analysis and skill-matching systems using machine learning algorithms
- ❖ Streamlined hiring workflows by reducing manual screening time and improving candidate evaluation accuracy
- ❖ Built scalable data pipelines and models using Python, Scikit-learn, Pandas, NumPy, and Deep Learning techniques
- ❖ Driving product development, feature design, and continuous model improvement based on user needs

ACADEMIC PROJECTS

1)Emotica – Sentiment Analysis Web App

- Built NLP-based sentiment classifier using Python and Streamlit
- Processed and classified text data into emotional categories
- Deployed a user-friendly interface for real-time predictions
- **Technologies Used:** Python, NLP, Streamlit, Scikit-learn,Flutter

2) Rakshatantra AI – Real-Time Industrial Safety System

- AI-based system to monitor worker safety using webcam input
- Detects fatigue, unsafe behaviour, and PPE (helmet) compliance
- Identifies hazardous conditions like unsafe zones and high temperature
- Triggers real-time alerts to prevent industrial accidents
- **Technologies Used:** Python, OpenCV, YOLO (Computer Vision), Machine Learning

3)Blooms – AI Plant Identification System

- Designed ML-based system to identify plant species and recommend care
- Integrated prediction logic for watering, sunlight, and soil requirements
- Applied solution for agriculture and home gardening use cases
- **Technologies Used :** Python, Machine Learning, TensorFlow (Basics), Pandas, Javascript,CSS, flutter

4)ClearCrowd - AI-powered Crowd Monitoring Web Application

- Developed a web platform to provide real-time crowd density insights using Computer Vision.
- Designed map-based visualization for location-wise crowd analysis.
- Built and deployed a scalable cloud solution on Microsoft Azure, integrating Azure Maps and Azure SQL Database for data handling.
- **Technologies Used:** Microsoft Azure, Azure Maps, Azure SQL Database, Azure Computer Vision, Azure App Service

POSITION OF RESPONSIBILITY

Student Interest Group – Artificial Intelligence & Data Engineering

Position: Lead | Alliance University (*Feb 2026 – Present*)

- Organized tech fests and hackathons for large student groups
- Led event planning, coordination, and execution
- Managed team collaboration and student engagement activities

ACHIEVEMENTS

- **Alliance TecX Hackathon:** Secured 2nd Place for ScreenerPro (AI recruitment platform) 
- **Codveda Hackathon (Powered by Microsoft Azure):** Achieved 3rd Place for developing a Workplace Risk Prediction & Safety System using IoT, Computer Vision, and Azure 

ACTIVITIES

- **Hackathons:** Participated and built AI-based solutions
- **Presentations:** Delivered technical demos and product presentations
- **Leadership:** Led academic project teams and collaborative development
- **Aptitude & Reasoning:** Strong problem-solving ability with advanced quantitative aptitude and logical reasoning

Certifications

Generative AI certification

Microsoft

Python Programming

University Of Michigan

Professional Data Science Certificate

IBM

Data Structure and Algorithm

NPTEL
